

NINGBO TCI TUBES
&
KOTAI STEEL PIPE

Your Partner in Global
Pipe Business Trade

BRIEF INTRODUCTION

Ningbo TCI Tubes was a business venture invested by Kotai Steel Pipe Co, Ltd and SKC Group in Taiwan. Established in 2003, our warehouse locates about 10 mins to Beilun Port, the 3rd largest port in China.

With access to more than 50,000MT of steel pipe stocks and over 30 mills in China, we are aiming to serve our customer's increasing needs for construction materials worldwide, not only in quantity but also for quality demanded.

We differentiate our services from the pipe mill in three ways:

First, we provide consulting services to help our client find the right material. We have engineers specialized in mechanical engineering and in pipe trade business.

Second, we have pipe stocks over 2000MT and accessible stocks of 50,000MT. Many of which are made in ASTM, API, and ASME standards. This allows us to provide timely delivery to help our client save both money and time. Our average delivery pace upon receiving the order is 20 days ready for loading at port.

Your Needs, We Care

BRIEF INTRODUCTION

Third, we provide a one-year product guarantee for items we deliver. In case there is a quality concern that makes the pipe not conforming to the standard, we will fix/replace the pipe for you.

Doing business with China presents many uncertainties and risks for foreign companies. With knowledge and experiences in both international commerce and pipe industries, we will help your company gain access to this market and look after your order throughout the manufacturing process and upon pipes loading at the port.

MILLS WE REPRESENT

We acquire our seamless stock mainly from the largest pipe mills in China. They are: Baosteel, TPCO, Hengyang, and Chengdu Seamless. For ERW pipes, we also have Baosteel, Kingland, Yulong and several mills available for your selections.
